Apollo-10 gets glimpse of an *Extraterrestrial* Monolith in Space; Later, a secret Military Space Shuttle retrieves the Space Beacon

by

Richard Boylan, Ph.D.

(c)1998

The following information was disclosed to me by a reliable confidential informant, who previously worked on contract for the National Security Agency and maintains connections within the Intelligence community. This informant (whom I shall call "Jesse") has over 40 years of notes from a very close relative, who served as CIA liaison to the National Security Council on UFO/ET matters. This information has been confirmed by a second source -- Dr. Michael Wolf of the National Security Council's unacknowledged subcommittee, the MJ-12 Special Studies group. I have talked with Dr. Wolf about the notes' author (Jesse's relative). Dr. Wolf said that that CIA official "was like an uncle to me."

The reports which follow are thus not "leaks" but rather based on planned releases of information. These releases are part of a public "acclimation program" -- an official though unacknowledged U.S. Government policy of "processed release of information" as Dr. Wolf described it.

According to "Jesse", in 1969 the Apollo-10 astronauts Stafford, Cernan, and Young were the first to film an *extraterrestrial* space beacon dubbed the "Monolith" (somewhat like -- but smaller than -- the one in Arthur C. Clarke's book/movie "2001"). They were not, however, the first astronauts to spot this ET beacon. The "Monolith" was first sighted by Russian cosmonaut Yuri Gagarin (the first man in space) in 1961. He was followed into space that same year by American astronaut Alan Shephard, who also sighted the beacon.

Apollo-10 went to it and filmed it from every angle. The "Monolith" acted like a communication beacon. Jesse said, "It sort of acts like the message received in the movie 'Contact'. It had a message on it in addition to a map of the *extraterrestrial* civilization which placed it there, and how to get to them."

The Apollo-10 astronauts brought back the message captured on film. The "Monolith"'s energy affected Apollo-10's instrumentation so that its crew almost didn't get back. As soon as the film that Apollo-10 took came back to Earth, those Intelligence compartments which deal with UFOs were busy poring over information from the "Monolith".

The Government then used an early secret military space shuttle to go get the "Monolith" itself. This covert military spacecraft flew years before the first "official" NASA Shuttle's public flights in 1981. The spaceplane is operated by a secret military astronaut program out of Vandenburg Air Force Base,

California among other locations. The second flight mission of this unacknowledged military shuttle retrieved the "Monolith" and brought it back to Earth in 1972 for study [1].

After being retrieved, the "Monolith" was then transferred to a secret research facility. Scientific analysis of the "Monolith" was conducted at this domed underwater facility located north of Abaco (the northernmost of the Bahamas Islands). RCA Corporation is in charge of that experimentation research, Jesse says. Jesse stated, "They did it underwater after they saw people dropping like flies. They figured that there would be better containment [of the "Monolith"'s suspected cosmic energy emanations] underwater." He noted that the space beacon "has a sound to it, like it talks. It also gives off a light show."

Dr. Michael Wolf shed additional light on the beacons. "They are 'postcards from the rim'. They emit both light and tone signals, sending a mathematical language. There may be 5-or-more *ET* civilizations involved in setting up these beacons."

Among the scientists who worked on it were famed astronomer Dr. Carl Sagan, U.S. Army Intelligence and Security Command General William Stubblebine (ret.), National Security Council consultant Dr. Michael Wolf, and a former division head of CIA. Everyone who had prolonged close physical contact with the "Monolith" got cancer, Jesse says. "And those who tried to dissect it [the "Monolith"] died right there on the spot." The CIA counterintelligence official and Dr. Wolf got colon cancer. The CIA man required surgery, but Dr. Wolf's cancer later went into a spontaneous remission. Dr. Sagan eventually died of his cancer.

Jesse feels that there are many more space beacons out in space acting as "postcards". "I'm sure Mother Russia had one." [2]

Jesse also revealed a 1973 formula for gravity control used by the military to construct anti-gravity aerospace vehicles [a]. He disclosed that noted quantum physicist **Jack Sarfatti** was in a position to be familiar with this gravity formula used by the government. Jesse observed, "With regard to Sarfatti as I can determine it [from the notes], he was on site doing work on the relationship between downed UFOs and back-engineering to the degree that he assisted in the gravity makeup formulae."

Jesse added that Sarfatti noticed that the captured UFO's field propulsion guidance was focused on the ET pilot. "[The UFO pilot console] had the hand placement with micro holes and light-emitting senses [sensors] to feel the impulse of the sudden hand movement. Hence it [pilot and UFO] became as one. The driver always feels the outer skin's 'road feel' so it [the UFO] can handle better than a Corvette at 125 mph in 5th gear in the big curve."

Jesse added, "Then again, Sarfatti has these [formula] numbers... He can attest to the numbers and even affirm that [anti-gravity field propulsion] is in use today! Matter of fact, the formulae even tell a story of the skin association between flyer and craft." [3] They [ET pilots] think [a command]... and go. Sort of like... point-click and ship! Boom... you're there.

"The RAND Corporation (a CIA think tank) holds the key to the [gravity-control] formulae." Jesse revealed. "Our Navy even set up the United Earth Space Naval Forces. I believe this group to be in existence today." [4]

U.S. Government's old gravity-control formula:

[a] $\phi(\mathbf{x}) = \langle \phi(\mathbf{x}) | 0 \rangle + \psi(\mathbf{x})$ where $\langle \phi(\mathbf{x}) | 0 \rangle$ is the vacuum expectation value and $m^2 \langle \phi(\mathbf{x}) | 0 \rangle^2$ represents the particle's density of the ground state in the non-relativistic limit. The

action of this field in the presence of gravity is... intrinsic gravitational cosmological constant $\Lambda/8\pi G$ receives a contribution $(1/2) m^2 \langle \phi(x) \phi(x) \rangle$.
